

USER GUIDE

Employee User Guide

Everything you need to do for yourself — clocking, leave, payslips and documents

WHO THIS GUIDE IS FOR

Every member of staff. This is the guide to read first, whatever else you do in the business.

WHAT YOU ARE ACCOUNTABLE FOR

- Clock in and out accurately, every shift
- Apply for leave in good time and keep your balance in mind
- Keep your personal, contact and emergency details up to date
- Upload the documents HR asks for, before they expire
- Check your payslip each month and query anything that looks wrong

How to use this guide

Work through the chapters in order the first time. After that, use the contents list below to jump straight to the task you need. Every instruction names the exact menu path and the exact button label you will see on screen.

A typical day in this role

- 1 Start of shift — clock in on Attendance > My Attendance.
- 2 During the day — check the bell for anything waiting on you.
- 3 End of shift — clock out and check today's hours are right.
- 4 Pay day — open My Payslip, check it, download the PDF for your records.

Contents

1.	Signing in for the first time	Sign-in screen
2.	Finding your way around	
3.	Your profile and personal details	Overview > My Profile
4.	Clocking in and out	Attendance > My Attendance
5.	Applying for leave	Leave > My Leave
6.	Your payslip and earnings	Payroll & Compensation > My Payslip
7.	Raising a request	Overview > Requests
8.	Your documents	Documents > My Documents
9.	Notifications and notes	Overview > Notifications / Notes
10.	Finding a colleague	Organisation > Company Directory
11.	Getting help	

1

Signing in for the first time

Where to find it: [Sign-in screen](#)

Get into the system safely and know what to do when the password does not work.

Sign in

Your account is created for you by an administrator — you cannot register yourself.

1 Open the system link supplied by your supervisor.

Use the same link every time. Save it as a bookmark on the device you work from.

2 Type your identifier in the first box.

Any one of these works: your work email, your username, your employee number (for example EMP-0001) or your registered phone number.

3 Type your password in the second box.

Tap the eye icon on the right of the box if you want to check what you typed.

4 Press Sign in to workspace.

5 Change the temporary password the first time you sign in.

Go to My Profile > Change password and set a password only you know.

If you have forgotten your password

1 On the sign-in screen, click Forgot password?

2 Enter your email, username, employee number or phone number and submit the request.

3 Wait for the administrator to action the request.

Password requests appear in the administrator's Password Resets inbox. They will give you a new temporary password.

4 Sign in with the temporary password, then change it immediately.

IMPORTANT

Never share your password or let someone else work under your login. Every action is recorded against the account that performed it, so anything done under your login is treated as done by you.

Common questions

It says my details are wrong but I am sure they are right.

Check that Caps Lock is off and that there is no space at the end of what you typed. If it still fails, use Forgot password? — repeated wrong attempts can lock the account.

My account says suspended.

An administrator has disabled the account. Contact your supervisor or HR; only an administrator can reactivate it.

2

Finding your way around

Understand the screen layout so you can reach any task quickly.

The three parts of every screen

- Left sidebar — the menu. Items are grouped (Overview, Attendance, Leave, Documents and so on). Click a group to open it, then click the screen you want.
- Top bar — search, notifications bell, and your profile picture. Your name and current role are shown here.
- Main area — the screen you selected. Most screens start with a heading, a short description, and buttons for the main actions on the right.

RULE

You only see the menu items your role is allowed to use. If a colleague has a menu item you do not have, that is by design — ask your supervisor if you believe you need access.

Things that work the same on every screen

- Filters sit above lists — narrow by date, status, department or branch, then click Clear to reset.
- Lists are paged. Use Prev and Next underneath the table to move through the records.
- Where an export is allowed, you will find Export CSV (for spreadsheets) or Download PDF (for printing and filing).
- A green message at the bottom of the screen confirms a save; a red message means nothing was saved and explains why.

TIP

The system works on a phone as well as a computer. On a phone, the menu is behind the button in the top-left corner.

3

Your profile and personal details

Where to find it: [Overview > My Profile](#)

Keep your own record correct — payroll, HR and emergency contact all depend on it.

What is on your profile

- At a glance — your photo, employee number, department, branch and job title.
- Contact — phone, email and address.
- Emergency contact and medical information — blood group, allergies, chronic conditions and notes used in an emergency.
- Banking details — the account your salary is paid into.
- Documents centre — copies of your ID, certificates and permits.
- Activity timeline — a record of changes made to your profile.

Update your details

- 1 **Open Overview > My Profile.**
- 2 **Find the section you need to change and click into it.**
- 3 **Type the new information.**
- 4 **Click Submit for approval.**
Changes are not applied immediately. HR reviews them first, which protects payroll and statutory records from mistakes.
- 5 **Watch your notifications for the outcome.**
HR can approve the change, reject it, or ask you for more information. Rejected changes tell you why.

Change your password

- 1 **Open Overview > My Profile.**
- 2 **Click Change password.**
- 3 **Enter your new password, confirm it, and save.**

IMPORTANT

Banking detail changes are treated as sensitive. Expect HR or Finance to confirm the change with you before it takes effect — that check exists to stop salary fraud.

4

Clocking in and out

Where to find it: [Attendance > My Attendance](#)

Record the hours you actually worked so your pay and leave are calculated correctly.

Clock in at the start of your shift

- 1 **Open Attendance > My Attendance.**
- 2 **Click Clock in.**
- 3 **Allow the device to use your location when the browser asks.**
Clocking is GPS-verified. If you block location access you cannot clock in, so allow it once and the device will remember.
- 4 **Wait for the message confirming GPS was captured.**
The system shows the accuracy, for example $\pm 12\text{m}$. If accuracy is poor it will automatically try again for a better fix.
- 5 **Check that the card at the top now shows your clock-in time.**

Clock out at the end of your shift

- 1 **Open Attendance > My Attendance.**
- 2 **Click Clock out and allow location access again.**
- 3 **Check the hours worked shown against today.**
If the number looks wrong, raise a correction the same day — see below.

TIP

If GPS accuracy is poor: step outside or closer to the entrance, wait a few seconds, and try again. Thick walls and roofs are the usual cause.

Report an attendance problem

Use this when the record does not match what really happened.

- 1 On Attendance > My Attendance, click Report an attendance issue.**
- 2 Choose the Issue type.**
Missing clock-in, Missing clock-out, Wrong recorded time, GPS / location violation, Duplicate or accidental clock, or Other.
- 3 Pick the date the problem happened.**
- 4 Describe what happened in the reason box.**
Be specific — 'arrived 07:55, phone had no signal until 08:20' is approved quickly; 'clock wrong' is not.
- 5 Click Submit for approval.**
- 6 Track the outcome under Correction requests on the same screen.**
HR approves or rejects it, and the record is fixed automatically when approved.

RULE

Never ask a colleague to clock in for you and never clock in for someone else. Both the time and the location are recorded, and mismatches are investigated.

5

Applying for leave

Where to find it: [Leave > My Leave](#)

Request time off, watch it move through approval, and keep track of the days you have left.

Apply for leave

- 1 Open Leave > My Leave.**
- 2 Check your Balances first.**
The balance cards show how many days you have available for each leave type.
- 3 Click New leave request.**
- 4 Choose the Leave type.**
- 5 Pick your start and end dates on the calendar.**
Select the first day, then the last day. The screen shows how many days you are committing.
- 6 Write the reason for the request.**
Your approvers see this. Give enough detail for someone to make a decision without phoning you.
- 7 Submit the request.**

What each status means

Status	What it means	What you should do
Pending	Waiting for the first approval step.	Nothing — wait, or follow up with your manager if it is urgent.
Manager approved	Your manager has endorsed it; HR still has to decide.	Wait for the final decision before making plans.
Info requested	An approver needs more information from you.	Open the request, read the note, and reply with what was asked.
Approved	The leave is granted and days are deducted from your balance.	Hand over your work before you go.
Rejected	The leave was not granted.	Read the reason. Speak to your manager before re-applying.
Cancelled	The request was withdrawn.	Re-apply if you still need the time off.

Also on this screen

- Upcoming approved leave — the time off you already have booked.
- Request history — every request you have made, filterable by status.
- Cancel — withdraw a request you no longer need. Do this rather than simply not taking the leave.

TIP

Apply as early as you can. Requests move through more than one approver, and a request submitted the day before is unlikely to be decided in time.

6

Your payslip and earnings

Where to find it: [Payroll & Compensation > My Payslip](#)

See what you were paid, understand the deductions, and keep copies for your records.

View and download a payslip

- 1 **Open Payroll & Compensation > My Payslip.**
- 2 **Find the pay period you want in Payslip records.**
Use the year filter if you are looking for an older period.
- 3 **Click the payslip to open the detail — gross, deductions and net pay.**
- 4 **Click Download to save a branded PDF payslip.**

This PDF is the copy to give to a bank, a landlord or a lender.

Reading your payslip

- Gross — total earnings before anything is taken off.
- Earnings — basic salary plus any allowances, overtime and bonuses for the period.
- Deductions — statutory deductions (tax, NISSA) and any loan repayments, advances or other agreed deductions.

- Net — what is actually paid into your bank account.
- YTD Breakdown — your totals so far this year.

Raise a payment query

- 1 On the same screen, open My payment requests.
- 2 Create a request describing the amount, the period and what you believe is wrong.
- 3 Track the status on the same list until Finance responds.

RULE

Your payslip is confidential. Do not circulate it internally, and do not ask colleagues for theirs.

7 Raising a request

Where to find it: [Overview > Requests](#)

Ask for anything that needs approval — HR, IT, travel or expenses — and keep a record of it.

Submit a request

- 1 Open Overview > Requests.
- 2 Click New request.
- 3 Choose the request Type and set the Urgency (Low, Normal, High or Urgent).
- 4 Write a clear Subject and a full Description.
- 5 Set Needed by where a date matters.

Approvers sort by this date, so an honest date gets you a faster answer than marking everything Urgent.

- 6 Submit, then follow progress under My requests.

Following up

- Each request shows its status: Pending, Approved, Rejected or Cancelled.
- The Activity trail shows who acted on it and when, along with any decision note.
- Cancel a request you no longer need instead of leaving it in the approver's queue.

8 Your documents

Where to find it: [Documents > My Documents](#)

Store and share the documents HR needs from you, and find the ones issued to you.

Upload a document

- 1 Open Documents > My Documents.

- 2 Drop the file onto the upload area, or click to browse for it.**
A clear photo or scan is fine. Make sure all four corners and any expiry date are readable.
- 3 Choose the Category so the document is filed correctly.**
- 4 Set Expires after where the document has an expiry date.**
The system can then warn you and HR before it lapses — licences and permits especially.
- 5 Save the upload.**

Managing what you have uploaded

- New folder — group documents so a long list stays usable.
- Rename document — fix a filename without re-uploading.
- Upload a new version — replaces the file but keeps the history, which is what you want for a renewed licence.
- Sort by Newest first, Oldest first, Largest first or Smallest first when you are hunting for something.

RULE

HR verifies uploaded documents. Until a document is verified it does not count as submitted, so upload the correct document the first time rather than a placeholder.

9

Notifications and notes

Where to find it: [Overview > Notifications / Notes](#)

Never miss an approval, a payslip or a request that is waiting on you.

Check your notifications

- 1 Click the bell in the top bar, or open Overview > Notifications.**
- 2 Use the Unread tab to see only what you have not read yet.**
The All tab keeps the full history.
- 3 Click a notification to jump straight to the screen it refers to.**
A leave notification opens Leave, a payslip notification opens Payroll, and so on.
- 4 Mark items as read once you have dealt with them so your list stays clean.**

Notes

- Overview > Notes is your private notepad — nobody else can see it.
- Give a note a title, content, a colour and tags so you can find it again.
- Use it for handover reminders, shift notes and anything you would otherwise write on paper.

10

Finding a colleague

Where to find it: [Organisation > Company Directory](#)

Look up who someone is, what they do and how to reach them.

Look someone up

- 1 **Open Organisation > Company Directory.**
- 2 **Type a name, employee number or job title in the search box.**
- 3 **Narrow with the Department and Branch filters if the name is common.**
- 4 **Open the person to see their contact details and who they report to.**

Personal details such as salary and banking are never shown in the directory.

11

Getting help

Know who to ask when something does not work or does not look right.

Who to contact

Problem	Who to ask
Cannot sign in, account locked or suspended	Your administrator
Wrong personal details, department or job title	HR
Attendance record is wrong	Submit a correction on Attendance, then HR
Leave balance looks wrong	HR
Payslip, deduction or payment query	Finance, via a payment request on My Payslip
A menu item you need is missing	Your supervisor, who will ask an administrator
Something on screen looks broken	Your supervisor or administrator, with a screenshot

Before you report a problem

- Note the exact screen you were on and the exact wording of any red message.
- Take a screenshot — it saves a long explanation.
- Try once more; a lost network connection is the most common cause of a failed save.

TIP

The system keeps working when your connection drops — actions are queued and sent when you are back online. Do not repeat an action many times because it looked slow.
